

**AMENDMENTS TO THE SPECIFICATION**

*In the third (last) paragraph of page 6, beginning on line 19, and concluding on page 7,  
line 8, please amend as indicated below:*

Sub D2  
C2  
Referring now to FIG. 2, an electrical schematic diagram illustrating the electrical components is shown. The flexible resistive type heat element 50 is connected in a series arrangement with the controlling thermostat 54, the power cord 30, and the power plug 32. As can be visualized via this arrangement, the controlling thermostat 54, will provide the regulation required for safe operating conditions. Additionally, FIG. 2 depicts the power receptacle 35, the power cord 30 39, and the power pack 37. The power pack 37, consists of a step-down transformer 60, and an electrical connector 62, to allow for connection to standard alternating current electrical power systems as found in residences and businesses.
